Case	Age	Sex	Duration of illness	Site of lesion	Pathological changes	Microscopic findings	Immunohistochemical findings
1	65	M	10 years	Right frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
2	60	F	5 years	Left frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
3	55	M	15 years	Right frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
4	62	F	12 years	Left frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
5	68	M	8 years	Right frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
6	63	F	10 years	Left frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
7	61	M	12 years	Right frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
8	64	F	10 years	Left frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
9	66	M	12 years	Right frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.
10	67	F	10 years	Left frontal lobe	Large, well-circumscribed, solid, grayish-white mass	Microscopically, the tumor was composed of large, polygonal cells with abundant eosinophilic cytoplasm and large, hyperchromatic nuclei. Mitoses were numerous.	Immunohistochemically, the tumor cells were positive for GFAP, S-100, and vimentin.

ical demands, the resignation of Gorbachev. To be sure, as part of Ukraine, Donbas was now on Leonid Kravchuk's conscience. Vorkuta and Kuzbas were coal-mining areas I had visited a number of times and to which I would certainly return. Their demands were harshly formulated at times, and they expected a great deal from me, but they supported me during the tough reforms.

We have a saying in Russia that when you chop wood, the chips fly. Although Khasbulatov tried his best to portray the miners as economic chips flying from the Gaidar team's woodcutting, their demand did not fit the picture. These miners were not

against reform. Nevertheless, they did try to defend their economic interests, insisting that such hard work should be rewarded with part of the overall profits from the industry. Unfortunately, we did not have precise mechanism to turn such enterprises as coal mines into joint stock companies. There were long, hard negotiations under way constantly.

I met Yuri Skokov when I worked at the Moscow City Executive Committee. He was director of Quannum, a large defense plant, and he had run for elections to the Soviet parliament against Vitaly Korotich, a prominent writer and journalist who at the time was editor in chief of *Ogonoyok* [Little Flame], a pioneer of glasnost. Due to various backroom deals and party scheming (described in *Against the Grain*), Skokov won the election and proved himself to be a disciplined party protégé.

Skokov is an intelligent man — that is the first thing that must be said about him. And very hard and taciturn. Many people were asking what his role was in my inner circle. It was a legitimate question. Skokov was actually the "shadow" prime minister whom I had always had in mind. Both Silayev, under whom Skokov chaired the Supreme Economic Council, and Gaidar, on whose watch Skokov became chairman of the Security Council, sensed a latent threat
